

WINDING TECHNOLOGY

Machinery for the production of motors, coils & transformers

WT 610

Specification

A machine for the production of low voltage transformers, distribution transformers, low and high voltage coils with paper insulation between layers. A 4 speed gearbox is fitted as standard to give a wide range of torques and speeds, making the machine very versatile. The machine is capable of winding coils from 10 KVA to 1.5MVA as well as coils designed within the specification given below.

Wire diameter	0.03 – 15mm
Pitch	0.02 – 50 mm
Coil diameter	600mm
Winding length	1000mm
Distance between centres	1100mm
Speed	max. 475 rpm
Torque	max. 2226 Nm
Control	PLC with touch screen

WT reserves the right to alter the specification of the machine without prior notice

Further Information

For more details and quotations on the machines please contact us directly or your local agent, see details below.
